Updated 23 October 2018

Note:

Table 30 now incorporates Tables 24,25,26,27,28,29

Urgent cases are given appointments within one day to two weeks, depending on the urgency

NICE Guidelines are not followed except with cancer patients who are seen within 2 weeks of their initial diagnosis.

The longest waiting times are in relation to Orthopaedic appointments.

Cardiology - Due to the departure of Dr Mejias in May 2018 there has been a backlog of referrals for routine appointments. May's referrals have been booked in for October 2018.

Once all referrals from June to August 2018 have been given an appointment there should be a reduction of at least 50% in waiting times.

Updated 30 July 2018

Note:

Table 30 now incorporates Tables 24,25,26,27,28,29

Urgent cases are given appointments within one day to two weeks, depending on the urgency

NICE Guidelines are not followed except with cancer patients who are seen within 2 weeks of their initial diagnosis.

The longest waiting times are in relation to Orthopaedic appointments and Cataract patients.

Doctors and nursing staff will be offered to hold extra clinics on weekends to reduce orthopaedic waiting lists.

There is already an initiative taking place during the months of July and August to reduce waiting list for Cataract patients.
