

ABSTRACT

OF

STATISTICS

2001

INTRODUCTION

This is the twenty-sixth Abstract of Statistics to be published.

The object of the Abstract is to provide a selection of statistics, in one compact volume, on topics of interest. Most of the information in this Abstract is published separately, and is therefore already in the public domain.

The tables contain notes and definitions which are important to the proper interpretation and use of the statistics.

During the last two years there has been considerable work done to improve the range, quality and timeliness of statistics to be published. Already many statistics are available sooner, and are of better quality than before. Next year's Abstract will comprise an improved format and an even wider range of data.

Copies of this Abstract can be obtained, free of charge from this Office or from the Publications Office.

Notes:

- (1) As in the UK and as from October 1998, the Employment Survey makes reference to the number of employee jobs in the labour market, formerly known as the number of persons in employment. This does not represent any change in the way the Survey has been conducted. As previously, a person holding both a full-time and a part-time job would thus be included in the count for each category.
- (2) "Official" sector refers to the Gibraltar Government and the U.K. Government Departments.
- (3) Occupations are classified according to the "Standard Occupational Classification 2000".
- (4) With effect from October 1998, the Employment Survey has been carried out directly with employers via questionnaire. During the period October 1992 to April 1998, the Report was compiled from PAYE returns submitted by employers to the Income Tax Office. This change makes it more difficult to be precise as to the distinction between UK British and British (Gibraltarian), since this classification now reflects nationality status as reported by the employers. Under the questionnaire method, employers are not required to submit the names of employees and it is therefore not possible to ascertain whether employers are correctly distinguishing between British (Gibraltarian) and Other British. The actual figure for British (Gibraltarian) is likely to be higher than that recorded.

- (2) The industry classification was revised with effect from October 1998 to follow that of the UK's Standard Industrial Classification (S.I.C. 92). As regards the "Financial Intermediation" and "Real Estate and Business Activities", these were previously included under "Banking, Finance and Insurance" and "Other Services".

Notes:

- (1) The major structural changes in the economy between the mid-1980's and early 1990's resulted in a more open private sector led economy. This progressively created a situation where there was insufficient quantitative and qualitative data about the contribution of this expanding private sector activity in the economy. Consequently, the residual errors in the National Income estimates were growing significantly from year to year throughout the 1990's and when the 1996/97 National Income estimates were being calculated, the residual error was too large for the estimates to be treated with any acceptable degree of confidence and reliability. Outside specialist advice was engaged which confirmed that the National Income estimates were weakly based and unreliable. An Input/Output Study was commissioned in 1999 which, inter alia, would provide a sound basis for recalculation of the National Income figures. The Study suffered delays for reasons outside the control of the Gibraltar Government and provisional results became available in May 2002. The 1996/97 to 1998/99 National Income Estimates are now being recalculated using the Input/Output Study.
- (2) Provisional estimate based on the preliminary results of the Input/Output Study. No figures for GNP are currently available.

Notes: (a) Refers to "derated" installed capacity which is the output which each set can normally be relied upon to give.

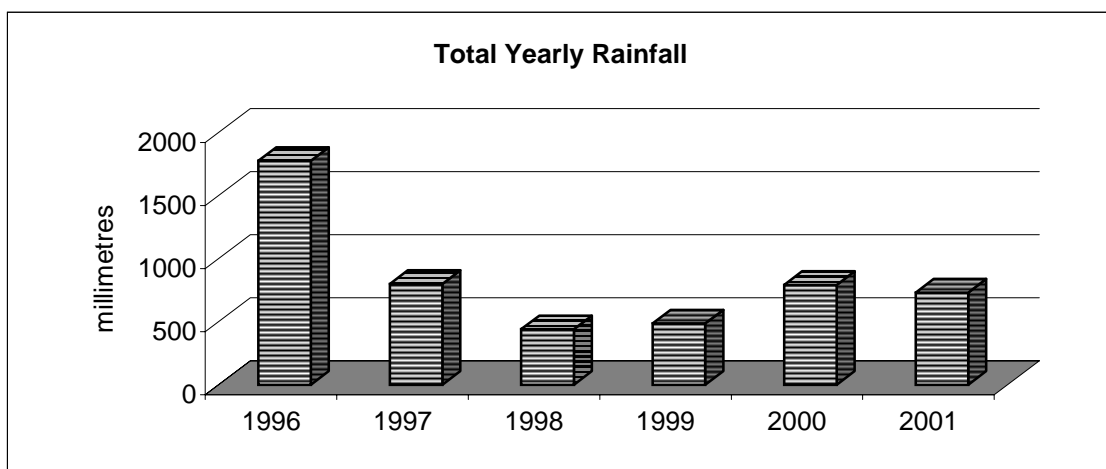

(b) The difference between "generation" and "billing" is attributed to electricity used by "Station Units" and to a very low and acceptable level of losses (cable fault, etc.)

(c) KW - Kilowatts, KWH - Kilowatt Hours, M - Million
