ABSTRACT

OF

STATISTICS

GOVERNMENT OF GIBRALTAR

INTRODUCTION

This is the twenty-fourth annual Abstract of Statistics to be published. The Abstract is a well established and widely used source of economic and social statistics on Gibraltar.

The object of the Abstract is to provide a selection of statistics, in a one compact volume, on topics of interest. The tables contain notes and definitions which should be read, particularly if the statistics are to be used and interpreted properly. Further information on these statistics may be obtained from the Statistics Office on written application. Suggestions on future editions are welcome and will be considered.

Unless otherwise stated the source of information in the report is the Statistics Office.

It is hoped that the Abstract offers a useful feedback of the information which is collected and processed by the Statistics Office.

Notes: (a) See Notes to Table 2.

(b) The 1961 figures show a significantly greater number of females than males. This is due partly to an imbalance in the Gibraltarian population and partly to the counting of Service families but not Servicemen. These two factors still count in the later figures but have been outweighed by the increase in labour from overseas, which is predominantly male.

Notes:

- (a) Refers to "derated" installed capacity which is the output which each set can normally be relied upon to give.
- (b) The difference between "generation" and "billing" is attributed to electricity used by "Station Units" and to a very low and acceptable level of losses (cable fault, etc.)
- (c) KW - Kilowatts, KWH - Kilowatt hours, M - Million
