

## 5.0 ALTERNATIVE SWIMMING POOL SITE

We were also asked to look at providing an alternative design for the swimming pool on another site that is currently to be used for parking and is closer to the beach. The site that was used for the pool in the first scheme would then be used for additional apartments.

The new pool design takes up approximately 100 parking spaces which are relocated under the new apartment block. The two other parking levels provide approximately 200 parking spaces which would be dedicated for the apartments above.
