PRESS RELEASE

No: 210/2010

Date: 25th August 2010

MULTI STOREY CAR PARK TO BE BUILT AT ENGINEER LANE

As part of the Government's Integrated and Parking Transport Plan a tender has been issued for the construction of a multi-storey car park situated at Engineer Lane. This car park is a continuation of the programme that has already seen car parks built at Willis's Road, New Harbours, Sandpits and under construction at Devil's Tower Road.

The Engineer Lane car park to be built on the site of the current Engineer House parking, will deliver a total of two hundred and one car parking spaces. The current programme for the works anticipates a start on site in early January 2011 with completion in July 2012.
