

PRESS RELEASE

No: 286/2010

Date: 4th November 2010

Drug Avandia

Further to the previous press release dated 25.09.10, regarding treatment for diabetes, the GHA wishes to confirm that the majority of people who have previously been prescribed Avandia and Avandamet have been seen in clinics during October and have had the necessary changes in their treatment instituted.

Anyone taking Avandia or Avandamet and who has not been seen in clinic during the month of October is invited to a 'Drop In' clinic at the Primary Care Centre with Nurse Practitioner Julie Parker on Monday 8th November, to discuss alternative treatment options. No appointment is necessary.
