

PRESS RELEASE

No: 154/2013

Date: 8th March 2013

The Gibraltar Health Authority – Practice Development Initiative

The Gibraltar Health Authority (GHA) is pleased to announce another of their awareness initiatives to be held in conjunction with the Breast Care Support Group. This will be held on Monday 18th March 8am – 1pm at Primary Care Centre and Friday 22nd March 8am – 1pm at St Bernards Hospital (foyer).

Our aims coincide with the aims of The Breast Care Support group which is to provide information and create awareness not only to health care professionals but to the general public.

It is important to highlight the vital need for Lymphoedema to be detected and treated as early as possible thus ensuring quality of life to those affected.

The Day will commence at 8am with both Practice Development and the Support Group setting the stand ready for staff and visitors. The stand will include information about Lymphoedema and will include leaflets and posters.
