Ministry of Health, the Environment,  
Energy and Climate Change

## PRESS RELEASE

No.898 /2015

Date: 3rd December 2015

---

### Thinking Green Digest 2014

The Department of the Environment and Climate has launched its latest annual report, in the form of the *Thinking Green Digest*, which is an overview of the work carried out during 2014.

The Digest is divided into five sections, entitled Our Natural Environment, Energy, Climate Change, Waste, and Educational Awareness. This publication provides the reader with an insight into the activities and functions performed by the personnel of the Department of the Environment and Climate Change.

In this edition of the Thinking Green Digest, a whole section is dedicated to the Department's latest awareness campaign dealing with Energy Efficiency. In this section, information is presented to enable the reader to take action and reduce their monthly utility bills as well as help improve Gibraltar's local environment.

Minister for the Environment and Climate Change, Dr John Cortes, commented, "The year 2014 was full of action in relation to the Environment, which remains at the core of Government activity, and it is important to share this with the public.

The 'Digest' format is a much more accessible one than the former annual reports. It will be of interest to anyone with an interest in what this dynamic Department does. I'm sure readers will enjoy reading it."

The Thinking Green Digest can be found on HM Government of Gibraltar's website at: <https://www.gibraltar.gov.gi/new/publications> under the subheading Annual Reports.
