## PRESS RELEASE

No: 697/2018

Date: 15<sup>th</sup> November 2018

### Management and Leadership Courses

Nine Officers from the Gibraltar Fire and Rescue Service have successfully completed a management course delivered by Mark Little Associates and endorsed by the Institution of Leadership and Management. This course has been possible thanks to the collaboration of the Department of Education.

The Potential Leaders programme focuses on developing future managers and preparing our junior ranks to embrace the risks and opportunities that accompany new and challenging leadership roles. The course objectives centre on ensuring we provide the foundation for future success and committing to developing strong leaders. This programme empowers our officers to overcome the increasingly complex challenges that emerge as they take on leadership roles. By exploring the pros and cons of diverse leadership styles and strategies, allowing them to expand their ability to build productive teams, champion change, lead in difficult situations, and create a culture of high performance.

The Gibraltar Fire and Rescue Service would like to congratulate all our officers for their achievements as we collectively embark in this progressive journey to ensure we can become a stronger more resilient organisation during these challenging times for the fire service.
