

PV MAINTENANCE GUIDANCE DOCUMENT

INFORMATION REQUIRED FOR SUBMISSION

The Department of the Environment and Climate Change has produced this guidance document to aid individuals, or companies, who require further clarification regarding the type of information expected when a PV (Photovoltaic) Maintenance Plan is conditioned.

The information provided below is for guidance purposes only. The following list is by no means exhaustive and definitive.

INFORMATION TO BE SUBMITTED

- i. Frequency of inspections:
 - a. Itemise PV components to be inspected.
 - b. Schedule for each set of components.
- ii. Cleaning Programme for the PVs being installed:
 - a. How often will the panels be cleaned?
 - b. How will they be cleaned? Are the products to be used certified as eco-friendly?
 - c. Water source, if required?
- iii. Maintenance of the whole system:
 - a. How will the panels be maintained?
 - b. How will the system be maintained?
 - c. How will the monitoring of efficiencies and the performance of the panels be carried out?
